

Introduction to Construction, Manufacturing & Maintenance (ICMM)

Resume has gaps?

Lack key industry certifications?

Need a broader range of skills?

Northwest College of Construction has what workers need to get an employer to say, “Yes”, at the next interview.

The ICMM course has been created for those who need a short, but intense course that provides key certifications required by many employers. These subject components have been developed at the national level and field tested to fill employer requirements for entry-level workers in multiple fields including construction, manufacturing, and maintenance.

Days: Monday – Friday, TBD	TIME: 8:00am – 4:30pm
PRICING: Call Guy Crawford for group rates, 503-256-7300	
Customization: This course can be customized per organizational requirements or budgetary considerations.
